

NAHUEL MARCILLI

SOFTWARE ENGINEER & CYBERSECURITY

nahuemarcilli@gmail.com | [+54 9 3775 40-2361](tel:+5493775402361) | linkedin.com/in/nahuel-marcilli | github.com/marili-mn | marili-mn.github.io/frontend-portfolio

PROFESSIONAL PROFILE

Full-Stack Developer trained in Web Engineering and Cyberdefense. I merge secure architecture and functional creativity to build solutions that protect businesses and ensure a captivating user experience. I apply robust engineering at every layer, integrating IT security with interface design to create applications that are armored inside and intuitive outside.

TECHNICAL SKILLS

Core Backend: Python (FastAPI, Django), Node.js, PHP (Laravel), Java (Spring), RESTful Architecture

Frontend & UI: JavaScript (ES6+), React, Next.js, Bootstrap, HTML5/CSS3

Data & Storage: PostgreSQL, MySQL, Data Modeling

DevSecOps: Git, Docker, CI/CD Pipelines, Linux Hardening

Methodologies: SCRUM, Jira, Trello, Requirements Engineering

Languages: Spanish (Native), English (Advanced), Portuguese (Intermediate), German (Basic)

PROFESSIONAL EXPERIENCE & PROJECTS

Software Architect Sep 2025 - Oct 2025
CreditBusters (Fintech)

Repo Back: github.com/Nahuel-a/Equipo-17-Pymes | Repo Front: github.com/marili-mn/CreditBusters

Demo Back: creditsbuster.onrender.com/docs | Demo Front: credit-busters-demo.vercel.app

- Engineered an SME credit onboarding platform using modular backend architecture with FastAPI (Python) and PostgreSQL.
- Ensured transactional integrity and data security in financial operations.
- Implemented a lightweight, high-performance frontend using Vanilla JS under strict MVC patterns.
- Managed the development lifecycle using SCRUM methodologies.

Tech: Python, FastAPI, Vanilla JS, MVC, PostgreSQL

Full-Stack Developer

Sep 2025 - Oct 2025

Grupo W - Academic Management

Repo: github.com/DeniLescano/GrupoW-Proyecto-TUDW | Demo: grupo-w-proyecto-tudw-demo.vercel.app

- Developed a comprehensive academic management system utilizing MVC architecture for data integrity.
- Designed efficient administration workflows for curricular data and student records via REST API consumption.

Tech: *Vanilla JS, Bootstrap, MVC, System Design*

Full-Stack Engineer

May 2025 - Aug 2025

Wizard Solutions AI

Repo: github.com/joseorteha/ClickMail | Demo: click-mail.netlify.app

- Designed and implemented microservices for scalable AI processing.
- Securely integrated RESTful APIs and orchestrated Docker containers for consistent, reproducible deployments.
- Optimized backend logic using Node.js for high-throughput performance.

Tech: *React, Node.js, Python, Docker, Microservices*

Frontend Engineer

Apr 2025 - May 2025

UNER E-Commerce

Repo: github.com/marili-mn/introDevWebUNER | Demo: marili-mn.github.io/introDevWebUNER

- Developed modular interface components without external framework dependencies (Vanilla JS).
- Optimized rendering and semantic structure for maximum browser compatibility and performance using Bootstrap.

Tech: *JavaScript, Bootstrap, DOM Manipulation, Performance*

Backend Developer

Feb 2025 - Mar 2025

Guau & Miao (NGO)

Repo: github.com/No-Country-simulation/c24-22-m-webapp | Demo: guau-and-miau.vercel.app

- Constructed secure APIs and resource management systems for organizational needs.
- Optimized database queries and implemented robust authentication using the Django ecosystem.

Tech: *React, Django, Security, REST API, Docker*

Backend Developer

Aug 2024 - Nov 2024

Skill-up E-Learning

Repo: github.com/No-Country-simulation/c20-14-m-python-react | Demo: skillup-client.vercel.app

- Designed secure RESTful APIs following strict MVC architecture patterns.
- Optimized database schemas with Python/Django and enhanced frontend performance with React.
- Delivered scalable solutions ready for high-concurrency user bases.

Tech: *React, Python, Django, MVC, Docker*

Frontend Developer

Apr 2024 - Jul 2024

n1Human E-Commerce

Repo: github.com/marili-mn/n1human-eCommerce | Demo: n1human.netlify.app

- Developed a responsive e-commerce platform using vanilla HTML, CSS, and JavaScript.
- Focused on seamless product browsing and optimized checkout processes.

Tech: HTML5, CSS3, JavaScript

Full-Stack Engineer (Personal Projects)

2021 - Present

Personal Portfolio & Brand

Repo: github.com/marili-mn/frontend-portfolio | Demo: marili-mn.github.io/frontend-portfolio

- Continuous development of a personal brand platform using Web Components and vanilla JavaScript.
- Implemented internationalization (i18n), dark/light mode theming, and terminal-based interactive UI.

Tech: JavaScript (Vanilla), Web Components, i18n, CSS3

EDUCATION

Bachelor's in Cyberdefense

In progress

Faculty of National Defense (FADENA)

Web: undef.edu.ar/fadena/carreras-de-grado/licciberdefensa

University Technician in Web Development

Completed

National University of Entre Ríos (UNER)

Web: fcad.uner.edu.ar/tecnicatura-universitaria-en-desarrollo-web
