NAHUEL MARCILLI

HEAD OF ENGINEERING, INFRASTRUCTURE & SECURITY · FULL STACK · DEVSECOPS

nahuemarcilli@gmail.com | +54 9 3775 40-2361 | linkedin.com/in/nahuel-marcilli | github.com/marili-mn | marili-mn.github.io/frontend-portfolio

PROFESSIONAL SUMMARY

Technical lead of a production EdTech SaaS platform, owning engineering, infrastructure and security end to end. Full-Stack developer with a degree in Web Development (UNER), currently studying Cyber Defense (UNDEF). I build "Secure by Design": applications that work, scale and are protected from day one, with verifiable deployments, backups and incident response. I use an AI-assisted development workflow while keeping full control and review of the code.

TECHNICAL SKILLS

Backend:	PHP (Laravel), Python (FastAPI, Django), Node.js, Java (Spring), REST APIs
Frontend:	JavaScript (ES6+), TypeScript, Next.js, React, Vue.js, Web Components, HTML5/CSS3
Data:	MySQL, PostgreSQL, Redis, data modeling, safe migrations
Infra / DevOps:	Linux (Ubuntu), Nginx, PHP-FPM, Docker/Podman, GitHub Actions (CI/CD), Sentry
Security:	Hardening (firewall, CrowdSec, fail2ban, auditd, AIDE), OWASP, STRIDE, vulnerability management, incident response
Cloud & AI:	Cloudflare (CDN/WAF), AWS, GCP, LLM agents (Gemini API), AI-assisted development
Methodologies:	SCRUM, Jira, Trello, requirements engineering
Languages:	Spanish (native), English (advanced), Portuguese (intermediate), German (basic)

PROFESSIONAL EXPERIENCE

Head of Engineering, Infrastructure & Security — Nov 2026 - Present

Confidential EdTech Startup · Remote · Full-time

- Technical lead of the platform: engineering, infrastructure and security end to end, working with the leadership team.
- Engineering: evolution of the learning platform and the schools dashboard; full redesign of the student experience.
- Infrastructure and DevOps: three environments, continuous integration in every repository (200+ automated tests), deployments with backup and rollback, and automatic security patching.
- Security: layered hardening, vulnerability management, incident response and periodic audits.
- Architecture, data and product: architecture standards, data model, safe migrations, runbooks and technical material for partners and investors.

Tech: PHP, Laravel, Vue.js, Next.js, TypeScript, MySQL, Redis, Nginx, Linux, GitHub Actions, Sentry

Full Stack AI Engineer · DevSecOps — Mar 2026 - Nov 2026

Confidential EdTech Startup · Remote · Full-time

- End-to-end owner of a production EdTech SaaS platform used by schools, teachers, students and families.
- Maintain and extend a PHP/Laravel + Vue monolith and a reporting API; built a Next.js/TypeScript schools dashboard with role-based access, traceable recoverable deletions and bulk student import.
- Migrated production and staging to self-managed Linux servers behind a CDN/WAF; operate Nginx, PHP-FPM, MySQL, Redis, queue workers and Node.js services.
- Server hardening, least-privilege database access and white-box security audits (OWASP, STRIDE); hot-patched critical PHP and Node.js vulnerabilities in production with no downtime.
- CI/CD with GitHub Actions and versioned deployments with backups, checksums and rollback; monitoring with Sentry and request tracing.
- AI: operate the platform's LLM tutor agent (Gemini API, Redis sessions) and use code agents with human review.

Tech: PHP, Laravel, Vue.js, Next.js, React, TypeScript, Python, MySQL, Redis, Nginx, Linux, Docker/Podman, GitHub Actions, Cloudflare, AWS, GCP, Sentry

Software Engineer · Freelance — Dec 2021 - Mar 2026

Self-employed · Remote

- Independent projects, job simulations with multidisciplinary teams (No Country), Oracle Next Education bootcamp and university projects (UNER), with security by design across the development lifecycle.

SELECTED PROJECTS

CipherCard (Fintech Prototype) · Software Architect — Dec 2025

`Repository: github.com/marili-mn/cipher-card | Demo: cipher-card.vercel.app`

- Mobile-first virtual card fintech app with Hexagonal Architecture and strict layer decoupling in TypeScript, focused on tokenized, disposable payments.

Tech: React, TypeScript, Hexagonal Architecture, Vite

CreditBusters (Fintech) · Software Architecture — Sep 2025 - Oct 2025

`Back repo: github.com/Nahuel-a/Equipo-17-Pymes | Front repo: github.com/marili-mn/CreditBusters`

- Credit onboarding for SMEs: modular FastAPI backend on PostgreSQL with transactional integrity; Vanilla JS MVC frontend; SCRUM.

Tech: Python, FastAPI, PostgreSQL, JavaScript, MVC

ClickMail AI (Wizard Solutions AI) · Full-Stack Engineer — May 2025 - Aug 2025

`Repository: github.com/joseorteha/ClickMail | Demo: click-mail.netlify.app`

- AI email marketing tutor: AI processing microservices, secure REST API integration and Docker deployments.

Tech: React, Node.js, Python, Docker

Grupo W, Guau & Miau, Skill-up and others · Full-Stack / Backend **2024 - 2025**

More projects: marili-mn.github.io/frontend-portfolio

- Academic management system (MVC + REST APIs), secure Django APIs for an NGO, e-learning platform (Django + React) and a native JavaScript e-commerce.

Tech: JavaScript, React, Python, Django, Bootstrap, Docker

EDUCATION

Bachelor's Degree in Cyber Defense **2025 - 2029 (in progress)**

National Defense University (UNDEF) · Faculty of National Defense (FADENA)

Web: undef.edu.ar/fadena/carreras-de-grado/licciberdefensa

Network security, ethical hacking and penetration testing, digital forensics, reverse engineering, cloud security and risk analysis.

University Technician in Web Development **Graduating 2026**

National University of Entre Ríos (UNER)

Web: fcad.uner.edu.ar/tecnicatura-universitaria-en-desarrollo-web

Front-end and back-end development, APIs and databases, software engineering and agile methodologies (SCRUM).

Oracle Next Education F2 T7 · Back-end **Jan 2025**

Alura Latam + Oracle (certification)
